“ASAP Security Systems is locally owned and has over 30 years experience. We are licensed by the state of Tennessee and have a business license. We are insured for liability and carry workmen’s comp. We are local Chamber members, as well as A+ Better Business and State & National Electronic Security Association members.

We do our own sales, installations and service. We do not subcontract or sale our accounts. A lot of large companies have 2 -3 separate companies or departments to deal with.

At ASAP you can always get service by calling 1 number.

All of our employees are Level 1 installers.

I’m sure you know you get what you pay for.”
