Cutting Your Phone Line

Whether you are concerned about the security of your phone service or the rising costs, many customers are choosing to use cellular or internet communications to meet their security needs.

Cellular: **AT&T or Verizon - LTE (5G ready)**

Cellular with Ethernet backup
With this choice we use the radio with strongest signal and connects to your internet. Either unit is $160, and the cell service is $15 per month.
You can add interactive service to the unit for $5 per month.

Internet: **Wi-Fi or Ethernet I.P.** (requires an open port on customer's router)
With this choice the unit is $160 and requires the additional fee of $10 per month which includes interactive service.

Interactive Service:

Allows the user to see the arm status of the system as well as remotely arm and disarm their system via their smart device or computer.

The user may also customize their personal event notifications to receive notifications for events such as alarms as-well-as arming activity by other users.

Monitoring Service:

The monthly fees listed above are in addition to the flat rate monitoring charge of $14.95 per month
(billed quarterly or annually)
